

U.S. National Ice Center

Weekly Ice Forecast for Chesapeake and Delaware Bays

Week of: 03/03/2025
nic_analyst@noaa.gov

Current Ice Conditions:

Ice free.

Ice Forecast:

No ice formation is forecast this week as temperatures over most of the region will remain above freezing. The northernmost portion of the Mid-Atlantic will see temperatures dip just below freezing overnight at times this week, but not low enough to allow for appreciable ice formation.

Delaware Bay:

Ice free.

Upper Chesapeake Bay:

Ice free.

Lower Chesapeake Bay:

Ice free.
